**N E W J E R S E Y**

**SELECT DRUG PROGRAM<sup>®</sup> FORMULARY**

**EFFECTIVE APRIL 1, 2012**

**[www.amerihealthnj.com](http://www.amerihealthnj.com)**

Dear Valued Member:

In an effort to continue our commitment to provide you with comprehensive prescription drug coverage, a formulary feature is included in your prescription drug benefit. A formulary is a list of selected drugs that are approved by the U.S. Food and Drug Administration (FDA) and reviewed by our Pharmacy and Therapeutics Committee. These prescription drugs have been selected for their reported medical effectiveness, safety, and value while providing you with the highest level of coverage under your prescription drug benefits.

Our pharmacy benefits manager, FutureScripts®, continuously monitors the effectiveness and safety of drugs and drug prescribing patterns. Several procedures support safe prescribing patterns for our prescription drug programs, such as:

- prior authorization;
- age and gender limits;
- quantity limits;
- 96-Hour Temporary Supply Program;
- coverage for medications not on the formulary.

These procedures are designed to optimize your prescription drug benefits by promoting appropriate utilization. They are based on FDA guidelines, and the criteria are endorsed by our Pharmacy and Therapeutics Committee.

A detailed description of the procedures that support safe prescribing is included at the end of the formulary list.

**Please note: Because prescription drug benefits vary by group, the inclusion of a drug in this formulary does not imply coverage. This formulary was current at the time of printing and is subject to change. Please call 1-888-678-7012 if you have any questions about your prescription drug benefits. Please discuss any questions or concerns about your drug therapy with your physician or pharmacist. Select Drug Program® Formulary information can also be obtained on our website at [www.amerihealthnj.com](http://www.amerihealthnj.com).**

Brand drugs listed in the formulary with a “3” in the immediate column to the right are available at the highest level of cost-sharing (i.e., the highest cost to you). It is displayed next to the equivalent formulary generic drug, that is available at the lowest level of cost-sharing (i.e., the lowest cost to you). For example: amoxicillin is the formulary generic drug available at the lowest level of cost-sharing. Amoxil is the non-formulary brand available at the highest level of cost-sharing. In most cases when brand drugs have a generic equivalent, the generic version is formulary and the brand version is non-formulary.

- Covered generic drugs not listed are formulary and are available at the lowest level of cost-sharing.
- Covered brand drugs not listed are non-formulary and are available at the highest level of cost-sharing.

Dear Physician:

This is a listing of formulary drugs to be considered for your patient, a Select Drug Program® participant. Please refer to this formulary guide in order to choose a drug. Because prescription drug benefits vary by group, the inclusion of a drug in this formulary does not imply coverage.

This formulary was current at the time of printing and is subject to change. Please understand that this formulary is not intended as a substitute for your independent, professional judgment. Rather, it is offered as a tool to help plan members recognize formulary drugs. We hope that you will refer to the formulary as a guide to prescribing formulary drugs.

## PROCEDURES THAT SUPPORT SAFE PRESCRIBING

AmeriHealth utilizes an independent pharmacy benefits management (PBM) company, FutureScripts, to manage the administration of its commercial prescription drug programs. As our PBM, FutureScripts is responsible for providing a network of participating pharmacies, administering pharmacy benefits, and providing customer service to our members and providers.

### **Prior authorization**

Prior authorization is a requirement that your physician obtain approval from your health plan for coverage of, or payment for, prescription drugs. AmeriHealth requires prior authorization of certain covered drugs to ensure that the drug prescribed is medically necessary, and appropriate, and is being prescribed according to FDA guidelines. The approval criteria were developed and endorsed by the Pharmacy and Therapeutics Committee, which is an established group of medical directors and practicing area physicians and pharmacists.

Using these approved criteria, clinical pharmacists evaluate requests for these drugs based on clinical data, information submitted by the member's prescribing physician, and the member's available prescription drug therapy history. Their review includes a determination that there are no drug interactions or contraindications, that dosing and length of therapy are appropriate, and that other drug therapies, if necessary, were utilized.

**Without prior authorization, the member's prescription will not be covered at the retail or mail-order pharmacy.** The prior authorization process may take up to two business days once complete information from the prescribing physician has been received. Incomplete information will result in a delayed decision.

Prior authorization approvals for some drugs may be limited to 6 to 12 months. If the prior authorization for a drug is limited to a certain time frame, an expiration date will be given at the time the approval is made. If the physician wants a member to continue the drug therapy after the expiration date, a new prior authorization request will need to be submitted and approved in order for coverage to continue.

**Prior authorization applies to all formulations of specific drugs, including but not limited to, tablet, capsule, and oral suspension.\***

### **Age and gender limits**

The FDA has established specific procedures that govern prescription prescribing practices. These rules are designed to prevent potential harm to patients and to ensure that the medication is being prescribed according to FDA guidelines. For example, some drugs are approved by the FDA only for individuals age 14 and older, such as ciprofloxacin, or prescribed only for females, such as prenatal vitamins. The pharmacist's computer provides up-to-date information about FDA rules. If the member's prescription falls outside of the FDA guidelines, it will not be covered until prior authorization is obtained. The prescribing physician may request consideration for preapproval of restricted medications when medically necessary. The approval criteria for this review were developed and endorsed by the Pharmacy and Therapeutics Committee. The member should contact the prescribing physician to request that he or she initiate the preapproval process. To determine if a covered prescription drug prescribed for you has an age or gender limit, call FutureScripts at 1-888-678-7012.

### **Quantity limits**

Quantity limits are designed to allow a sufficient supply of medication based upon FDA-approved maximum daily doses and length of therapy of a particular drug. We have several different types of quantity limits that are explained in detail below.

#### **Rolling 30-day period**

This quantity limit is based on dosing guidelines over a rolling 30-day period. For example, if a member went to the pharmacy on July 1, 2011, for one of these medications, the computer system would have looked back 30 days to June 1, 2011, to see how much medication was dispensed. The purpose of these limits is to make certain that these drugs are being used appropriately and to guard against overuse or stockpiling.

Examples of quantity limits per rolling 30-day period are:

- **Emend® (four 125mg capsules + eight 80mg capsules or four trifold packs [one 125mg capsule + two 80mg capsules]); Boniva® (two 150mg tablets); Avonex® (one kit, four injections); Betaseron® (15 vials); Copaxone® (32 vials); Fosamax Plus D™ (five tablets); and Rebif® (12 injections);**
- **migraine drugs, such as Amerge® (nine 2.5mg tablets), Imitrex® (36 50mg tablets), Maxalt® (12 10mg tablets), Migranal® (eight 4mg nasal spray units), Stadol NS® (four 10mg units), and Zomig® (nine 5mg tablets);**
- **sedative hypnotic drugs, such as Sonata® (14 capsules) and Ambien® (14 tablets);**
- **oral narcotic drugs, such as OxyContin® (90 units), Percocet® (180 units), and Percodan® (180 units).**

#### **Refill too soon**

With this quantity limit, if a member used less than 75 percent of the total day supply dispensed, the claim will be rejected at the pharmacy. This will ensure that the drug is being taken in accordance with the prescribed dose and frequency of administration.

#### **Therapeutic drug class**

This quantity limit applies to some classes of drugs, such as narcotics (i.e., short-acting and long-acting). If a member uses more than one drug within the same class, he or she may be unsafely duplicating drugs and would be affected by the total quantity limits for a therapeutic drug class. Members will be able to obtain only a 30-day total supply of any combination of drugs in the same therapeutic drug class each month.

If a physician requires that a member uses a drug therapy that exceeds any of the quantity limits described above, the physician must request consideration for a quantity limit override. The member is required to contact the prescribing physician to initiate a preapproval request for an override.

Some drugs may have a time period for quantity limit exceptions of 6 to 12 months. If the exception for a drug is limited to a certain time frame, an expiration date will be given at the time the approval is made. If the physician wants a member to continue the drug therapy that exceeds a quantity limit after the expiration date, a new request for a quantity limit exception will need to be submitted and approved in order for coverage to continue.

To determine if a covered prescription drug prescribed for you has a quantity limit, call FutureScripts at 1-888-678-7012.

### **96-Hour Temporary Supply Program**

The 96-Hour Temporary Supply Program applies to the following covered drugs:

- most drugs that require prior authorization;
- drugs that are subject to age limits (pre-approval required for ages outside of recommended ranges);
- migraine drugs with quantity limits, such as Amerge<sup>®</sup>, Imitrex<sup>®</sup>, Maxalt<sup>®</sup>, Migranal<sup>®</sup>, Stadol NS<sup>®</sup>, and Zomig<sup>®</sup> (preapproval of quantity override required for amounts over the quantity limits).

Under the 96-Hour Temporary Supply Program, if a member's physician writes a prescription for a drug that requires prior authorization, has an age limit, or exceeds the quantity limit for a medication, and prior authorization has not been obtained by the physician, the following steps will occur:

1. The participating retail pharmacy will be instructed to release a 96-hour supply of the drug to the member with no out-of-pocket cost-sharing (i.e., no cost to the member) at that time.\*
2. By the next business day, FutureScripts will contact the member's physician to request that he or she submit the necessary documentation of medical necessity or medical appropriateness for review.
3. Once the completed medical documentation is received by FutureScripts, the review will be completed, and the medication will be approved or denied.
4. If approved, the remainder of the prescription order will be filled, and the appropriate prescription drug out-of-pocket cost-sharing will be applied.\*
5. If denied, notification will be sent to both the physician and the member.

Obtaining a 96-hour temporary supply does not guarantee that the prior authorization/preapproval request will be approved. Some drugs are not eligible for the 96-Hour Temporary Supply Program due to packaging or other limitations such as Retin-A<sup>®</sup> (tube), Enbrel<sup>®</sup> (two-week injection kit), medroxyprogesterone acetate (monthly injectable), and erectile dysfunction drugs. Additionally, certain drugs to treat hemophilia (antihemophilic factors) are not usually purchased at the pharmacy and must be special-ordered; therefore, they are not eligible under the 96-Hour Temporary Supply Program.

*\*Members with an integrated drug benefit (e.g., Comprehensive Major Medical and Major Medical) will pay the discounted cost of the 96-hour supply as well as the remainder of the prescription order (if approved) at the time of purchase, and the medical claim for reimbursement will be processed through standard procedures.*

## **The process for requesting a prior authorization/preapproval or override is as follows:**

- The physician prescribing the drug completes a prior authorization form or writes a letter of medical necessity and submits it to FutureScripts by fax at 1-888-671-5285. The forms are available online at: [www.futurescripts.com/for\\_health\\_care\\_professionals/prior\\_authorization](http://www.futurescripts.com/for_health_care_professionals/prior_authorization). The form must be completed and submitted by the physician, not the member.
- FutureScripts will review the prior authorization request or letter of medical necessity. If a clinical pharmacist cannot approve the request based on established criteria, a medical director will review the document.
- A decision is made regarding the request.
- If approved, the prescribing physician will be notified of approval via fax or telephone, and the claims system will be coded with the approval. The member may call the Customer Service phone number on his or her ID card to determine if the prescription is approved.
- If denied, the prescribing physician will be notified via letter, fax, or telephone. The member is also notified of all denied requests via letter. The appeals process will be detailed within the denial letters sent to the member and physician.

### **Coverage for drugs not on the formulary (specific to Select Drug Program members only)**

Providers may request consideration for formulary coverage of a covered non-formulary medication when all formulary alternatives have been exhausted or there are contraindications to using the formulary alternatives. The provider should complete the covered non-formulary appeal form, providing detail to support use of the covered non-formulary medication, and should fax the request to 1-888-671-5285. If the non-formulary exception request is approved, the drug will be paid at the appropriate formulary level of cost-sharing. If the request is denied, the member and provider will receive a denial letter with the appropriate appeals language. Whether an appeal is filed, the member may always obtain benefits for the covered non-formulary drug at the appropriate non-formulary level of cost-sharing. Out-of-pocket expenses for non-formulary drugs are higher than for formulary drugs.

### **Appealing a decision**

If a request for prior authorization/preapproval or exception results in a denial, the member, or physician on the member's behalf, may file an appeal. Both the member and his or her physician will receive written notification of a denial, which will include the appropriate telephone number and address to direct an appeal. In all cases, the physician needs to be involved in the appeals process to provide the required medical information for the basis of the appeal.

### **Prescription drug program provider payment information**

FutureScripts administers our prescription drug benefits and is responsible for providing a network of participating pharmacies and processing pharmacy claims. FutureScripts also negotiates price discounts with pharmaceutical manufacturers and provides drug utilization and quality reviews. Price discounts may include rebates from a drug manufacturer based on the volume purchased. AmeriHealth anticipates that it will pass along a high percentage of the expected rebates it receives from FutureScripts through reductions in the overall cost of pharmacy benefits. Under most benefits plans, prescription drugs are subject to a member cost-sharing.
