

Specialty medical benefit drug list

Each specialty medical benefit drug below is categorized according to its most commonly recognized therapeutic indication or treatment class. Some drugs can be used for indications other than those that are listed below.

Drugs that are not included in the list either may not be considered specialty drugs, or may be eligible for coverage under the member's pharmacy benefit. Drugs eligible for coverage under the pharmacy benefit are typically drugs that members can administer to themselves (e.g., oral agents, topical agents, self-injectable drugs). Biosimilars to any reference products on this list are considered specialty drugs after they have been approved by the U.S. Food and Drug Administration.

This list is subject to change without notice. For additional information about AmeriHealth Specialty Medical Benefit Drugs, call the telephone number on the member's insurance card.
