

VALUE FORMULARY  
EFFECTIVE APRIL 1, 2024

[www.amerihealth.com](http://www.amerihealth.com)

## INFORMATION FOR MEMBERS AND PROVIDERS

The Value Formulary Guide is intended to help members and providers understand prescription drug coverage under the AmeriHealth Value formulary. We are committed to providing comprehensive prescription drug coverage. To achieve this, we include a formulary feature in your prescription drug benefit. The drugs are approved by the U.S. Food and Drug Administration (FDA). They are also reviewed by our Pharmacy and Therapeutics Committee, a group of doctors and pharmacists from the area. These prescription drugs have been added to the Value Formulary for their reported medical effectiveness, safety, and value.

The pharmacy benefits manager monitors all drugs to ensure they are safe and effective.

**Please note:** Prescription drug benefits vary by group. Therefore, a drug on this formulary does not imply coverage. Drug coverage is based on medical necessity. This formulary guide was current at the time of printing and is subject to change. Please call Customer Service at the number listed on the back of your ID card if you have any questions about your prescription drug benefits. Please discuss any questions or concerns about your drug therapy with your provider or pharmacist.

### **What is a formulary?**

A formulary is a list of prescribed medications or other pharmacy care products, services or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications.

This list is guided by the Pharmacy and Therapeutics Committee. The committee reviews which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

### **What are tiers?**

Tiers are the different cost levels you pay for a medication. Each drug on the formulary is in a tier.

### **Value Formulary tier structure**

The non-preferred tier will usually cost more than the preferred brand tier or generic tier. Below is a summary of tiers in the general order from lowest to highest level of cost-share. Benefits vary by group, so the inclusion of a drug in this formulary does not guarantee coverage. All cost-share tiers may not be available on all plans.

- Low-Cost Generic (availability varies by benefit)
- Generic
- Preferred Brand
- Non-preferred Drug
- Specialty (availability varies by benefit)
- Non-Formulary

**The non-preferred tier on the formulary is generally associated with higher cost-sharing (i.e., at the higher cost to you) than the preferred brand tier or generic tier. Non-formulary drugs are covered when a formulary exception is obtained through the prior authorization process. Please refer to the Procedures that Support Safe Prescribing in the front of the formulary list for details.** Non-formulary drugs are covered when a formulary exception approval has been obtained for which the member will pay the highest, non-specialty level of cost-sharing.

- Generally, if a brand-name drug has a generic equivalent, the brand-name drug is *non-formulary* while the generic equivalent is covered at the generic level of cost-sharing.  
**For example:** Cipro® is the brand drug and is considered non-formulary; its generic equivalent ciprofloxacin is available at the generic level of cost-sharing.
- Some brand-name drugs without generic equivalents and generic drugs are also considered *non-preferred*. This is because there are other more cost-effective alternatives covered on the formulary to treat the same condition.

Covered generic drugs not listed in the formulary guide are available at the generic level of cost-sharing; brand drugs not listed in the formulary guide are non-formulary.

**The Low-Cost Generic [LCG] tier** offers copays lower than the cost-share for the generic tier, when possible. This applies to certain generic drugs that are typically used to treat chronic conditions such as high blood pressure, high cholesterol, diabetes, heart failure, and depression. Benefits may vary. Not all plans provide this incentive. The drug list is subject to change. When this incentive is not available on a plan, these drugs will be covered at the generic cost-share level.

**Specialty Drugs [SP]** meet certain criteria, including, but not limited to drugs used to treat rare, complex, or chronic diseases, drugs that have complex storage and/or shipping requirements, and drugs that require comprehensive patient monitoring and/or education. Specialty drugs covered under the pharmacy benefit may be managed by your pharmacy benefit managers Specialty Pharmacy Program. Benefits may vary, and many plans cover specialty drugs on a specialty tier with higher cost-sharing. For cost-sharing purposes, drugs on the specialty tier are not eligible for tier lowering.

#### **What are Affordable Care Act (ACA) preventive medications?**

Certain preventive medications, as described in the Patient Protection and Affordable Care Act and detailed by the U.S. Preventive Services Task Force, are covered without cost-sharing with a prescription when provided by a participating retail or mail-order pharmacy.

The following categories of drugs may be available at no member cost-share with a prescription. Please note that individual benefits may vary. Always refer to your benefits to determine your coverage. This list is subject to change. Refer to the searchable drug lookup tool on your health insurance plan's website to check the status of a specific drug.

Category	Product(s) Available at \$0 at the Pharmacy
<b>Aspirin products (OTC)</b> For women after 12 weeks' gestation who are at high risk for preeclampsia	aspirin 81mg (tab/chewable)
<b>Bowel preparations</b> Bowel preparation for colonoscopy needed for preventive colon cancer screening, for ages 45-75	generic bowel preparation products such as Gavilyte-C™, Gavilyte-G™, Gavilyte-N™, Gavilyte-H™ with bisacodyl, polyethylene glycol (PEG) 3350 oral powder, Trilyte® w/packets
<b>Breast cancer chemo prevention</b> For asymptomatic females age 35 years and older without a prior diagnosis of breast cancer, ductal carcinoma in situ, or lobular carcinoma in situ, who are at high risk for breast cancer and at low risk for adverse effects from breast cancer chemoprevention	tamoxifen 20mg
<b>Contraceptives</b> Includes, but not limited to, oral, injectable, transdermal, diaphragms, cervical caps, intravaginal devices, condoms, and contraceptive film and jelly (in accordance with the women's preventive services provisions of the ACA). Note: IUDs and implantable products are covered under the medical benefit.	<ul style="list-style-type: none"> <li>- Oral: generics such as Amethia, Cryselle-28, Emoquette, Fayosim, Necon, Ocella, Sprintec, Trivora</li> <li>- Injectable: all generics such as medroxyprogesterone injection</li> <li>- Transdermal: Xulane® patches</li> <li>- Diaphragms</li> <li>- Cervical Caps</li> <li>- Condoms</li> <li>- Contraceptive film</li> <li>- Contraceptive gel/jelly/foam: such as VCF® foam 12.5%, 28%, Options Conceptrol® 4%, Options Gynol® 3%, Phexxi®</li> <li>- Emergency: all generics such as levonorgestrel 1.5mg tab, My Way® 1.5mg tab</li> <li>- Intravaginal devices: etonogestrel-ethinyl estradiol vaginal ring</li> </ul>
<b>Fluoride</b> For children ages 6 months to 16 years. Includes generics strengths <b>up to 0.5mg</b>	sodium fluoride 1.1 (0.5f) mg/ml solution sodium fluoride 0.55 (0.25f) mg chewable tab Fluoritab 0.275 (0.125f) mg/drop solution Fluoritab 1.1 (0.5f) mg chewable tab
<b>Folic acid</b> For women planning for or capable of pregnancy. Limited to 0.4 to 0.8mg of folic acid. For women younger than 51 years of age	folic acid 400mcg tab folic acid 800mcg tab folic acid 0.8mg capsule (including generic prenatal vitamins with the above listed folic acid dose)

Category	Product(s) Available at \$0 at the Pharmacy
<p><b>Tobacco cessation medication</b> For adults ages 18+ years, who use tobacco products and want to quit</p>	<p>varenicline tab bupropion SR (generic Zyban®) tablet nicotine polacrilex lozenge nicotine patch 24 hour transdermal Nicotrol® Inhaler Nicotrol® NS Solution</p>
<p><b>Statins</b> Low-to-moderate dose statin for prevention of cardiovascular disease, recommended for ages 40-75 years without a history of CVD when 1 or more CVD risk factors are present (e.g., dyslipidemia, diabetes, hypertension, or smoking) and a calculated 10-year risk of a cardiovascular event of 10% or greater</p>	<p>lovastatin 10mg lovastatin 20mg lovastatin 40mg</p>
<p><b>HIV PrEP</b> Preexposure prophylaxis (PrEP) with effective anti-retroviral therapy for persons who are at high risk of HIV acquisition</p>	<p>Emtricitabine-Tenofovir Disoproxil Fumarate Tab 200-300mg Tenofovir 300mg</p>
<p><b>Vaccines</b> To prevent certain illnesses in infants, children, and adults. Include immunizations to prevent Influenza, Pneumococcal, Shingles, and Respiratory Syncytial Virus Infection (RSV)</p>	<p>- Influenza: Afluria®, Fluzone [Quad]®, Fluzone®, Fluarix®, Flumist®, Flublok®, Fluad®, Flucelvax®, Flulaval® - Pneumococcal: Prevnar 13®, Pneumovax 23®, Prevnar 20™, Vaxneuvance® - Shingles: Shingrix®* - RSV: Arexvy™**, Abrysvo™***</p> <p>*Note: Applies to members at least 19 years of age. Cost share applies for members 18 years of age.</p> <p>**Note: Applies to members at least 60 years of age.</p> <p>***Note: Applies to members at least 60 years of age or for pregnant individuals at 32 through 36 weeks gestational age.</p>

## PROCEDURES THAT SUPPORT SAFE PRESCRIBING

AmeriHealth utilizes an independent pharmacy benefits management (PBM) company to manage the administration of its prescription drug programs. Our PBM is responsible for providing a network of participating pharmacies, administering pharmacy benefits, and providing customer service to our members and their providers. The effectiveness and safety of drugs and drug-prescribing patterns are monitored by the PBM. Several procedures, such as prior authorization, age limits, and quantity limits, have been established to support safe prescribing patterns and to provide optimal clinical outcomes for members.

### **What is prior authorization?**

Prior authorization is a requirement that your provider obtain approval from your health plan for coverage of, or payment for, prescription drugs. AmeriHealth requires prior authorization of certain covered drugs to confirm that the drug prescribed is medically necessary, clinically appropriate, and is being prescribed according to FDA approved labeled or medically accepted use. The approval criteria were developed and approved by the Pharmacy and Therapeutics Committee, a group of physicians and pharmacists from the area. Using these approved criteria, clinical pharmacists evaluate requests for these drugs based on clinical data, information submitted by the member's provider, and the member's available prescription drug therapy history. The clinical pharmacists' evaluation may include a review of potential drug-drug interactions or contraindications, appropriate dosing and length of therapy, and utilization of other drug therapies, if necessary.

Please note, coverage of certain drugs on the formulary (e.g., weight loss drugs) requires a benefit rider. Please contact the health insurance plan for member eligibility information and benefit details.

Claim dollar limits are placed to require review for clinical appropriateness on prescription claims exceeding a defined dollar limit threshold. The member's provider will need to submit a prior authorization request to any claim exceeding \$10,000.

**Without prior authorization, the member's prescription will not be covered at the retail or mail-order pharmacy.** The prior authorization review process may take up to two business days once complete information from the provider has been received. Incomplete information may result in a delayed decision. Prior authorization approvals for some drugs may have a limited timeframe, for example six to twelve months. If the prior authorization approval for a drug is limited to a certain timeframe, an expiration date will be given at the time the approval is made. If the provider wants a member to continue the drug therapy as requested after the expiration date, a new prior authorization request will need to be submitted and approved for coverage to continue.

### **Safety Edits**

Safety edits are applied to prescription medications to ensure safe and appropriate use of drugs. They are designed to align with the clinical practice guideline and FDA approved use outlined in the manufacturer package insert. Some of these safety edits will prompt member counseling at the point of sale, while some will require prior authorization review. Safety edits include age limits, quantity limits, morphine milligram equivalent (MME) limits, and concurrent drug utilization review (cDUR). Each safety edit is described below.

### **Age Limits**

Some drugs, such as zafirlukast, are approved by the FDA only for individuals age five and older. If the member's prescription falls outside of the FDA guidelines, it may not be covered unless prior authorization is obtained. In addition, an age limit may be applied when certain drugs are more likely to be used in certain age groups. For example, drugs to treat Alzheimer's disease may require prior authorization for use in young adults. The provider may request coverage for drugs outside of the age limit when medically necessary. The approval criteria for this review were developed and approved by the Pharmacy and Therapeutics Committee. The member should contact the provider to initiate the prior authorization process.

## Quantity Limits

Quantity limits are designed to allow a sufficient supply of medication based upon FDA-approved maximum daily doses, standard dosing, and/or length of therapy of a drug. AmeriHealth has several different types of quantity limits that are explained in detail below. The purpose of these limits is to ensure safe and appropriate utilization. If a member requires more than the limit, the member's provider will need to submit a prior authorization request. Similar to other prior authorization requests, quantity limit override requests for certain drugs may have a limited approval timeframe.

- **Quantity Over Time:** This quantity limit is based on dosing guidelines over a rolling time period. For example, if a drug has a quantity limit over a 30-day time period and a member went to the pharmacy on January 1, 2024, for one of these medications, the plan would have looked back 30 days to December 2, 2023, to see how much medication was dispensed. The purpose of these limits is to prevent the dispensing of excessive quantities. Examples of quantity limits over time are:
  - Etonogestrel-ethinyl estradiol (Nuvaring<sup>®</sup>) = 1 ring per 28 days
  - Ibandronate (Boniva<sup>®</sup>) 150mg = 1 tablet per 30 days
  - Sumatriptan (Imitrex<sup>®</sup>) 50mg = 18 tablets per 30 days
  - Diabetic supplies such as blood glucose test strips = 200 strips per 30 days
  - Sildenafil (Viagra<sup>®</sup>), tadalafil (Cialis<sup>®</sup> 10mg, 20mg) = 8 tablets per 30 days
- **Maximum daily dose:** This quantity limit defines the maximum number of units of the drug allowed per day. Examples of maximum daily dose quantity limits are:
  - Zolpidem (Ambien<sup>®</sup>) = 1 tablet per day
  - Oxycodone/acetaminophen (Percocet<sup>®</sup>) 5/325mg = 12 tablets per day
  - Guanfacine Extended Release 24 Hour = 1 tablet per day
- **Refill too soon:** This limit is in place to encourage appropriate utilization and minimize stockpiling of prescription medications. Based on this edit, a member can receive a refill of a prescription after 75% utilization. Additional refills will be covered once 75% of the supply has been consumed. The following examples illustrate how refill too soon limit works:
  - A 30 days' supply of a prescription filled on 1/1/2024 will be refillable again on or after 1/24/2024
  - A 90 days' supply of a prescription filled on 7/1/2024 will be refillable again on or after 9/7/2024
- **Day Supply Limit:** This limit is based on the day supply and not the quantity. However, quantity limits may apply as well. Day Supply Limits apply to some classes of drugs, such as opioids. If a quantity limit applies, the member will also be limited to the maximum daily dose for that drug. The following are examples of drugs that have a day supply and a quantity limit:
  - Short acting opioids, such as oxycodone/acetaminophen 5mg/325mg
    - Day supply limit = Two 5 days' supplies limit per 60 days for adults, two 3 days' supply limit for children under 18 years of age.
  - Butalbital containing headache agents, such as butalbital/aspirin
    - Day supply limit = 5-day supply per 30 days
    - Quantity Limit = 6 tablets per 1 day
    - Maximum quantity allowed without prior authorization = 30 tablets (6 tablets per day for 5 days)

- Opioid containing cough and cold products, such as hydrocodone/homatropine
  - Day supply limit = Two 5-days' supplies limit per 60 days for adults, and two 3 days' supply limit for children under 18 years of age
  - Quantity Limit = 30ml per 1 day
  - Maximum quantity allowed without prior authorization = 150ml (30ml per day for 5 days)

### Morphine Milligram Equivalent (MME) Limit

AmeriHealth applies additional safety measures to opioid products by limiting the total daily dose. This limit accounts for various opioid products through a measurement called the Morphine Milligram Equivalent (MME) dose. The MME is a number that is used to determine and compare the potency of opioid medications. It helps to identify when additional caution is needed. The daily limit is calculated based on the number of opioid drugs, their potencies and the total daily usage. Prior authorization is required for an opioid dose that exceeds 90 MME per day. MME Limit applies to the opioid products containing the active ingredients listed below:

Active Ingredient			
codeine	dihydrocodeine	fentanyl	hydrocodone
hydromorphone	levorphanol	meperidine	methadone
morphine	Opium	oxycodone	oxymorphone
tapentadol	Tramadol	benzhydrocodone	

### Cumulative Stimulant Limit

Central nervous system (CNS) stimulants such as amphetamine and methylphenidate, when used in high doses, are associated with increased risk for cardiac related adverse events such as hypertension and new or worsening psychosis including manic behavior. Cumulative stimulant limit is a safety measure designed to ensure the provider has assessed the members for alternative medication and advised the members about the risks associated with stimulant use. The cumulative stimulant limit works by calculating the total daily stimulant dose by the drug's active ingredient. Stimulant claims that exceed the limit outlined below would require prior authorization.

Active ingredient	Medications impacted (brands and generics)	High cumulative daily dose
Amphetamine	Adzenys ER <sup>®</sup> [ODT], Dyanavel <sup>®</sup> , Evekeo <sup>®</sup> [ODT]	60mg/day
Amphetamine-Dextroamphetamine	Adderall <sup>®</sup> [IR/XR], Mydayis <sup>®</sup>	60mg/day
Dextroamphetamine	Dexedrine <sup>®</sup> , Zenedi <sup>®</sup> , ProCentra <sup>®</sup> , Xelstry <sup>™</sup>	60mg/day
Lisdexamfetamine	Vyvanse <sup>®</sup>	70mg/day
Methamphetamine	Desoxyn	60mg/day
Dexmethylphenidate	Focalin <sup>®</sup> [IR/XR]	40mg/day
Methylphenidate	Ritalin <sup>®</sup> [IR/LA], Daytrana <sup>®</sup> , Cotempla <sup>®</sup> , Metadate <sup>®</sup> [ER/CD], Methylin <sup>®</sup> , Quillivant <sup>®</sup> XR, Concerta <sup>®</sup> , Aptensio <sup>®</sup> XR, QuilliChew <sup>®</sup> ER, Jornay PM <sup>™</sup> , Adhansia <sup>®</sup> XR, Relexxii <sup>®</sup>	72mg/day
Serdexmethylphenidate	Azstarys <sup>™</sup>	52.3mg/day

\*Prior authorization and other safety edits including quantity limit and age limit continue to apply.

## Concurrent Drug Utilization Review (cDUR)

These reviews are built into the pharmacy claim adjudication system to review a member's prescription history for possible drug related problems including drug-drug interactions and drug therapy duplications. Drugs may reject at the Point-of-Sale (POS) and/or generate a message to the dispensing pharmacist when there is a safety concern. The dispensing pharmacist can review the issue with the provider and override the rejection if appropriate for most edits. Examples of cDURs are:

- Drug-drug interaction: sildenafil (Viagra<sup>®</sup>/Revatio<sup>®</sup>) and nitroglycerin in combination may lead to potentially fatal hypotension.
- Drug therapy duplication: Simvastatin and atorvastatin in combination will trigger a message in the claim adjudication system to alert the dispensing pharmacist there is a duplication of statin therapy.

To determine if a covered prescription drug prescribed for you has a prior authorization requirement, an age limit, a quantity limit, or a morphine milligram equivalent (MME) limit, see the plan website at <https://www.amerhealth.com/resources/for-providers/policies-and-guidelines/index.html> or call your pharmacy benefit manager at the phone number on the back of your ID card.

## How to submit a Prior Authorization?

Here is the process to request a prior authorization/preapproval or override:

1. The provider prescribing the drug can access electronic prior authorization (ePA) platforms such as CoverMyMeds<sup>®</sup> and SureScripts<sup>™</sup> to submit a prior authorization request. Alternatively, the provider can complete a prior authorization fax form or write a letter of medical necessity and submit it to your pharmacy benefit manager by fax at 1-888-671-5285. The forms are available online at: <https://www.amerhealth.com/resources/for-providers/policies-and-guidelines/index.html>. The pharmacy benefit manager will review the prior authorization request or letter of medical necessity. If a clinical pharmacist cannot approve the request based on established criteria, a medical director will review the document
2. A decision is made regarding the request
  - If approved, the provider will be notified of the approval via fax and/or telephone, and the pharmacy claim adjudication system will be coded with the approval. Note: ePA approval can occur in real time, this means the member can be approved for the drug prior to leaving the provider's office with a prescription. The member may call the Customer Service phone number on his or her ID card to determine if the request is approved.
  - If denied, the prescribing provider will be notified via letter, fax, or telephone. The member is also notified via letter. The appeals process is detailed within the denial letters sent to the member and provider.

## **Formulary exception requests**

**Non-formulary drugs:** Providers may request consideration for coverage of a non-formulary medication when there has been a trial of, or contraindication to, at least three formulary alternatives when applicable.

**Tier exceptions:** Providers may request consideration for preferred coverage of a non-preferred drug when there has been a trial of, or contraindication to, at least three formulary alternatives when applicable.

- Requests for a generic medication that is located on the non-preferred drug tier to be lowered to the generic tier will be approved if the exception criteria are met.
- Requests for a brand medication that is located on the non-preferred drug tier to be lowered to the preferred brand tier will be approved if the exception criteria are met.

Please note, restrictions apply to formulary exception requests. Drugs on the generic tier, the preferred brand tier and the specialty tier are not eligible for tier exceptions. Tier exceptions are not available under some plans; please refer to the member benefit booklet for details.

When requesting an exception, the provider should complete the formulary exception request form, providing detail to support the request, and fax the request to 1-888-671-5285. If the formulary exception request is approved for a non-preferred drug, the drug will pay at the appropriate preferred brand or generic level of cost-sharing. If the request is denied, the member and provider will receive a denial letter with the appropriate appeals language. The forms are available online at: <https://www.amerihealth.com/resources/for-providers/policies-and-guidelines/index.html>.

## **Appealing a decision**

If a request for prior authorization or exception results in a denial, the member, or the provider on the member's behalf (with the member's consent), may file an appeal. Both the member and his or her provider will receive written notification of a denial, which will include the appropriate telephone number and address to direct an appeal. To assist in the appeals process, it is recommended that the provider be involved to provide any additional information on the basis of the appeal.

**Prior authorization applies to all formulations of the following specific drugs, including but not limited to, tablet, capsule, and oral suspensions.\*+**

abiraterone	Brukinsa™	diclofenac gel 3%	Fetzima™
Actemra® SC	buprenorphine patch	diclofenac sodium soln	Filspari™

## Reading the formulary drug list

### How can I tell if a drug is generic or brand?

The formulary gives you choices so you and your doctor can decide your best course of treatment. In this formulary, brand-name medications start with an uppercase letter and are written in **bold**. Generic medications are shown in *lowercase and in italic*.

<b>Brand name Drug</b>	<b>Starts with UPPERCASE in Bold</b>	<b>Ex: Augmentin</b>
<i>Generic drug</i>	<i>Lowercase italic</i>	<i>Ex: avidoxy</i>

### Tier information

Tiers are the different cost levels you pay for a medication. Each drug on the formulary is in a tier. Below is a reference guide to use as you review your formulary to see the abbreviation for each drug tier on the formulary list.

<b>Drug Tier</b>	<b>Abbreviation</b>
Generic	G
Non-preferred drug	NPD
Specialty drug	SP
Low-cost generic	LCG
Preferred brand	PB
Non-Formulary	NF
\$0 Preventive drug	ACA

### Drug list requirements and/or limits

Some medications are noted with letters next to them to help you see which drugs may have coverage requirements and/or limits. Below is a reference guide to use as you review your formulary to see the abbreviation for each requirement/limit on the formulary list.

<b>Requirements/Limits</b>	<b>Abbreviation</b>
Prior Authorization	PA
Quantity Limits Apply	QL
Age Limit	AL
Limited Distribution Drug	LDD
Day Supply Limit	5DS
Requires Rider	R
Quantity Over Time	Q/T
Morphine Milligram Equivalent	MME

## Discrimination is Against the Law

This Plan complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. This Plan does not exclude people or treat them differently because of race, color, national origin, age, disability, or sex.

This Plan provides:

- Free aids and services to people with disabilities to communicate effectively with us, such as: qualified sign language interpreters, and written information in other formats (large print, audio, accessible electronic formats, other formats).
- Free language services to people whose primary language is not English, such as: qualified interpreters and information written in other languages.

If you need these services, contact our Civil Rights Coordinator. If you believe that This Plan has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can file a grievance with our Civil Rights Coordinator. You can file a grievance in the following ways: In person or by mail: ATTN: Civil Rights Coordinator, 1901 Market Street, Philadelphia, PA 19103, By phone: 1-888-377-3933 (TTY: 711) By fax: 215-761-0245, By email: [civilrightscoordinator@1901market.com](mailto:civilrightscoordinator@1901market.com). If you need help filing a grievance, our Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at <https://ocrportal.hhs.gov/ocr/portal/lobby.jsf> or by mail or phone at: U.S. Department of Health and Human Services, 200 Independence Avenue SW., Room 509F, HHH Building, Washington, DC 20201, 1-800-368-1019, 800-537-7697 (TDD). Complaint forms are available at <http://www.hhs.gov/ocr/office/file/index.html>.
